

# DMX MP3 VMusic2 Player

Technical T

## Overview

The DMX MP3 VMusic 2 Player provides up to 32- sound tracks of playback with volume control when connected to a DMX network

The board Base Address may be set between 1 and 510.

Playback, Stop, Pause and Resume functions  
Select any one of up to 32 MP3 recordings  
Select to control the volume either with the left and right channels ganged (3 DMX channel operation) or separately (4 DMX channel operation). ( NOTE: due to the restrictions of the VMusic2 Player , the volume levels cannot be updated more than once every 0.5 seconds.

## Connections

- DMX:** 2-way terminal block- DMX connections 2 and 3
- Power:** 2-way terminal block- requires 9 Vdc at 0.5 A DC
- VMusic2:** 7-way header to match to the VMusic2 serial interface connector

## Command Syntax

The DMX- VMusic2 interface requires 3 or 4 consecutive control channels.

## Base Address Selection

The Base Address is read continuously and may be set from 1 to 510  
The base address is calculated by adding the values associated with each DIP switch that is set to ON  
Address 0 is treated as being 1

## Power LED

Correct power applied- Solid Green

## DMX Status LED

Receiving valid DMX signal- Solid Red, No DMX signal, Flashing Red

**Track Playing LED** (yellow)

## Overview

DIP Switches  
(Addressing)

16+32 = 48

## Board Address DMX - Values

Base address  
selectable  
between 1 and 510

Address 0 is  
treated as being 1

### Setting the base address:

Add the value of the address DIP switches set to the ON position to calculate the base address.  
Example: DIP switches 5 and 6 set to ON position, the base address is now 48, (16+32) this setting is used to determine the starting address output of Channel-1, the next Channel would be address 49 for Channel-2, and the next 50 for Channel-3, 51 for Channel-4.

CHANNEL-1	
Command Byte	
Value	Playback Functions
0-63	= Stop
64-191	= Play or resume currently track
192-255	= Pause

CHANNEL-2 (See Track Chart for full Listing)	
Command Byte	
Value	Sound Track Number
0-7	= 001.MP3 (Sound FX Track - 1)
8-15	= 002.MP3 (Sound FX Track - 2)
16-23	= 003.MP3 (Sound FX Track - 3)

CHANNEL-3	
Command Byte	
	● If SW10 is Set to ON
Value	Operation - Volume
0-255	Volume for both the Left and Right Audio Channels (0 is Mute)
	● If SW10 is Set to OFF
0-255	Volume for Left Audio Channels (0 is Mute)

CHANNEL-4	
Command Byte	
	● If SW10 is Set to OFF
Value	Operation Volume
0-255	Volume for Right Audio Channels (0 is Mute)

## Command Syntax

Base address is read continuously and may be set from 1 to 510

**The DMX-VMusic2 Interface requires 3 or 4 consecutive control channels.**

- Channel-1 = Operation- Stop, Play, Pause
- Channel-2 = Track ( 001.MP3, 002.MP3, 003.MP3..... 032.MP3)
- Channel-3 = Operation- (SW10- ON) - Volume control for both Left and Right Audio Channels )
- Channel-3 = Operation- (SW10- OFF)- Volume control for Left Audio Channels )
- Channel-4 = Operation- (SW10- OFF)- Volume control for Right Audio Channels )

# DMX MP3 VMusic2 Player Board

## Overview

**Note: The Sound Files must be named as shown below, or they will not work with the MP3 Player when operated.**

## **MP3 Audio Controller & USB Flash Drive used on Macintosh Computer with OS X... System**

### **Troubleshooting - Macintosh Computer - OS X System Hints and Guide**

**NOTE:** any number of file can be recorded from 1 to 32 audio files. The length of the recorded audio files available is determined by the size of the USB Flash Memory Drive.

Min number=1 file (001.mp3) and the Max number=32 file (032.mp3)

Audio File Size= As large as the USB Flash memory Drive capacity is.

#### **Q. I have recorded my sounds, but nothing plays back when I activate theDMX Channel.**

- A. Check to see that you have named the audio files correctly. For example, if you only have 5-MP3 audio files on the drive, they would be named "001.mp3" "002.mp3" "002.mp3" "004.mp3" "004.mp3"
- A. Check to see if your Hide File Extension display is turned ON in your computer, if so, then the files probably have double extensions added, "001.mp3.mp3. -" 021.mp3.mp3. **The second extension is incorrect, should be 001.mp3** to "032.mp3, Turn Hide OFF and rename the files. Try using just the file name "001" without a period.
- A. Check to see that the audio files you are using are not a different format, The audio file must be MP3 type.
- A. Check your USB Flash Memory Drive to see that it has been formatted as a blank drive, before adding you new sound files, Some USB Flash Memory Drives have a security or Auto Boot feature that prevents the MP3 player from using the sound files correctly even when formatted. Re-format your USB Flash Memory Drive removing any security or Auto Boot formats first. **(Format USB Flash Drive as a MS-DOS FAT)** Try a different USB Flash Memory Drive type, as some manufacture brands operate different than others.

#### **Macintosh OS X Operating System - USB Flash Drive Formating**

1. Disk Utility Application
2. Select USB Flash Drive
3. Erase - Set to MS-DOS FAT
4. Partition- Current
5. ERASE

USB Flash Drive

## **Audio Controller & USB Flash Drive Formatting Drives**

### **Formating USB Flash Drive for PC (Windows Platform (OS) Method - 1**

#### **Windows Platform (OS)**

1. Start your computer and plug in the flash drive in the USB port.
2. Click on "My Computer." Click on "Manage" in the "Explorer" window of "My Computer."
3. Open the "Device Manager" and locate your USB Drive installed under the "Disk Drives" tab. Right click on "Removable Disk Drive" and click on "Properties" from the menu.
4. Click on the "Policies" tab and choose "Optimize for Performance" from the options. Click "OK" and continue.
5. Click on "My Computer" and choose the format on the flash drive.
6. Choose "FAT or FAT16" from the dropdown menu box.
7. Click "OK" to complete the format.

## **MP3 Audio Controller & USB Flash Drive Formatting Drives**

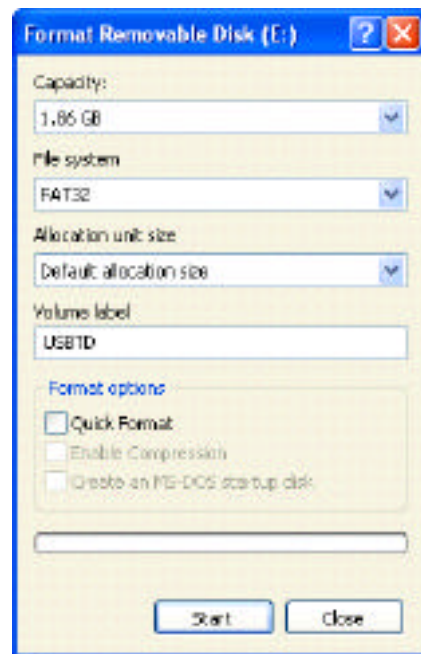

### **Formatting USB Flash Drive for PC (Windows Platform (OS) Method - 2**

1. Formatting a drive, of any kind, will wipe out all of the data on that drive. Make sure you've copied any files from your USB thumb drive to a different location before formatting.
2. Plug in the device and open My Computer. Right-click the USB drive and select Format....

3. Select the File System "FAT or FAT16" and give the drive a name in the Volume label field. Click Start to format the drive.
